PROFILE

Full Stack Developer experienced in building end-to-end web systems with Java (Spring Boot), Node.js/Express (NestJS), PHP and C#/.NET, with professional experience in systems support and process automation. Skilled in SQL databases, REST API development and integration, JWT authentication and role-based access control, as well as deployment and infrastructure configuration on AWS. Ranked in the top 10% in Systems Engineering at UTP. Advanced English proficiency.

FEATURED PROJECTS

ChecaBien - Civic electoral information platform *2026 · NestJS · TypeScript · TypeORM · MySQL · Redis/Bull · AWS · Puppeteer*

Production backend (NestJS REST API) for a civic platform providing verified information about political candidates, with a social media reach of 5M and 40k active users, featured by media outlets including La Encerrona and Bruno Pinasco's TEC program.

- Formalized the database schema using TypeORM migrations (disabled automatic synchronize), including a safe deployment runbook (backup -> migration -> reload).
- Modeled electoral domain entities (people, electoral processes, territories and offices) and their relationships across more than 20 tables.
- Built the automated scraping module (Puppeteer + Bull Queue), integrating official JNE data with AI extraction (Perplexity, Mistral) for candidate backgrounds and investigations.
- Configured and manage AWS infrastructure (EC2, RDS/Aurora, S3, ECS, Database Migration Service) for backend deployment.
- Collaborate using Git Flow, pull requests and team code reviews on GitHub.

Radar - Live emergency map of Lima *2026 · Node.js · Express · React · Leaflet · Anthropic API*

Production application that retrieves public reports from Peru's General Volunteer Firefighters Corps and plots them on a real-time map. Each incident opens a thread where residents report what they see; an AI agent compares the thread with the official report to identify discrepancies, while a second agent autonomously detects citywide patterns. Includes layered rate limiting, content moderation and browser-side proximity calculations to protect user location. Installable as a PWA. Built for Portal's The Realtime Hackathon.

BotiClic - Pharmacy e-commerce with prescriptions and delivery *2026 · Java 21 · Spring Boot · Spring Security · JWT · MySQL*

Platform with four roles (customer, administrator, pharmacist and delivery driver), each with distinct permissions over shared data. Implemented access control using Spring Security and JWT, with rules by HTTP method and role, BCrypt passwords, centralized error handling and a layered architecture. Includes prescription validation, geolocation-based order tracking and email notifications.

github.com/rosalesdev928/boticlic

ey-fit-pack - Validation REST API *2025 · C# · .NET · Entity Framework Core · Swagger*

REST API documented with Swagger and a dynamic database provider (SQLite / SQL Server), allowing database engines to be switched without changing business logic.

PROFESSIONAL EXPERIENCE

Backend Developer (Freelance) · ChecaBien Aug 2026 - Present

- Develop the NestJS/TypeScript backend for a civic electoral information platform, including data modeling, TypeORM migrations and REST APIs.
- Implement scraping and AI processing (Puppeteer, Bull Queue, Perplexity and Mistral) using official JNE sources.
- Configure and manage AWS infrastructure (EC2, RDS, S3) for system deployment.
- Collaborate using Git Flow and team-reviewed pull requests.

Analyst I - Systems Support and Automation · HITSS Peru SAC (Client: Claro Peru) Mar 2026 - Jun 2026

- Provided specialized technical support for Claro Peru's internal systems and applications.
- Automated repetitive tasks and processes in desktop applications, improving execution times.
- Developed and optimized advanced SQL queries for data validation, extraction and control.
- Diagnosed and resolved configuration- and code-level issues in internal applications.
- Managed tickets in BMC Helix (Remedy) and documented technical procedures.

IT Intern · COSESA Inversiones SAC Aug 2025 - Jan 2026

- Provided technical and functional support for internal systems; handled and tracked incidents.
- Performed functional testing of forms and user workflows, SQL verification queries and technical documentation.

Web Application Developer (Freelance) · Grupo Farma SAC Feb 2025 - Aug 2025

- Developed and implemented an end-to-end web-based management system for the business.
- Designed the relational database model and built business logic and data validation.
- Developed data entry and search interfaces and SQL queries for operational reports; used Git for version control and produced technical documentation.
- The system was adopted across all business data entry processes, significantly reducing manual entry errors and the time required to enter sales.

IT Technical Support · Claro Peru Feb 2024 - Dec 2024

- Resolved end-user IT incidents involving software, hardware and configuration; logged, tracked and escalated tickets.

TECHNICAL SKILLS

Backend: Java · Spring Boot · Spring Security · Node.js · Express · NestJS · PHP (OOP) · C# · .NET · REST APIs · JWT · Role-based access control

Frontend: React · Vite · Tailwind · Bootstrap · JavaScript · HTML · CSS · Thymeleaf · EJS · jQuery

Databases: MySQL (advanced) · SQL Server (intermediate) · PostgreSQL

Cloud: AWS (EC2, RDS/Aurora, S3, ECS, DMS, Bedrock, Cognito, Lambda, VPC) · Azure (basic) · Docker · Linux

Tools: Git / GitHub · Postman · Advanced Excel · Power BI

Methodologies: Scrum · Kanban

Languages: Spanish (native) · English (advanced)

EDUCATION AND CERTIFICATIONS

Systems and Computer Engineering · Universidad Tecnologica del Peru (UTP) - Aug 2020 - Jul 2026
10th semester · Top 10% of the class · Generacion TOP

Finance Studies · Pontificia Universidad Catolica del Peru (PUCP) - Aug 2023 - Dec 2024
Completed 5th semester (studies on hold)

Certifications

- AWS Agentic AI Demonstrated - Amazon Web Services (2026) · Hands-on microcredential: Amazon Bedrock AgentCore, Guardrails, Cognito OAuth 2.0 and VPC isolation
- AWS Data Lakehouse Demonstrated - Amazon Web Services (2026) · Hands-on microcredential: Amazon Athena and data analytics services
- AI Skills Fest 2026 - Microsoft
- Advanced English - ICPNA (2022)
- SQL (MySQL / SQL Server): From Beginner to Advanced - Udemy (2024)
- Modern JavaScript (ES6+) - Udemy (2025)
- Power BI: Analysis and Dashboards - Udemy (2023)
- Object-Oriented Programming with JavaScript - Platzi (2025)
- Python Fundamentals - Platzi (2025)
- Databases with SQL - Platzi (2025)
- Introduction to Cybersecurity - Cisco Networking Academy (2026)
- Implement Load Balancing on Compute Engine - Google Cloud Skills Boost (2024)
- Set Up an App Dev Environment on Google Cloud - Google Cloud Skills Boost (2024)
- Develop Your Google Cloud Network - Google Cloud Skills Boost (2024)
